Subject: PLEASE, PLEASE, PLEASE Do not use your smart phones in your cars!
Date: Friday, August 01, 2014 5:49:11 PM

While driving to work this morning, my Fiancé Cyndi witnessed a terrible accident up-close and far too personally. The girl driving the car in the photos below is OK, but she flipped her car right in front of Cyndi, almost crashing into her in the process also.

Cyndi watched as the car flipped over and over, and raced to the girl's side. Luckily the girl in the car just suffered a few cuts and bruises. Luckily she was wearing her seat belt.

What caused her to lose control of her vehicle? She was changing channels on her **Pandora App** on her smart phone.

You get the reminders every day about no texting. Don't fall victim to the distractions your cell phone presents to you in your car. Pandora, Facebook, etc...

Remember, IT CAN WAIT.

Have a great weekend – and please be **SAFE.**

A handwritten signature in blue ink, appearing to read 'Wayne Johnson'.
